- Allows you to **customize the identifying names** of instruments/resources and classify them into categories.
- **Send commands** to instruments on the network (defrost, power on/off, lights, etc.).
- **User management.** Allows you to customize each user's home page and default language.

- Easy access to **historical information** through tables and graphs.
- Alarm history.
- **System alarm notifications** via email.
- Management of all instrument resources: probes, digital inputs, statuses, relays, alarms, parameters.

- Real-time data.
- Asynchronous reading and recording of digital data.

- **Remote management** via your LAN connection. Web environment compatible with smartphones, PCs, and tablets.

Easy Gate

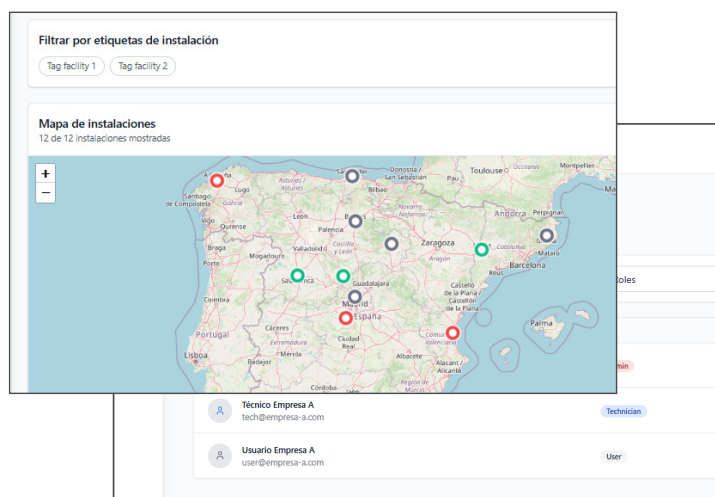

IT IS A WEB PORTAL THAT PROVIDES ACCESS TO YOUR DEVICES WITHOUT COMPLICATIONS, WITHOUT OPEN PORTS OR A FIXED IP ADDRESS.

Access the website for your remote management devices from anywhere, with complete security.

Easy Gate creates a secure connection between your local devices and the cloud, allowing you to access them from any web browser.

Forget about opening ports, configuring VPNs, or contracting fixed IPs. Simply connect your equipment to the computer network. The connection is **automatic, encrypted, and requires no technical maintenance.**

- ✓ ACCESS FROM ANYWHERE.
- ✓ VERY SIMPLE CONFIGURATION.
- ✓ 100% WEB-BASED ACCESS, SECURE AND ENCRYPTED.
- ✓ LICENSE PER COMPUTER WITH NO RECURRING PAYMENTS.

From your control panel, you can:

- Access your devices with a single click.
- Make encrypted backups in the cloud.
- Classify and organize your centers, giving access to customers and/or collaborators.
- Geolocate them on an interactive map.
- Add additional information about each center.
