

EWHT – HUMIDITY CONTROL / DRYERS

PROCESSES FEEDING | INDUSTRIAL PROCESSES | FOOD | DRYERS

> DESCRIPTION

General purpose control for control of humidity and temperature conditions.

> APPLICATIONS

Generic and configurable temperature and humidity conditions controller for production and maintenance processes of cheese, deli, meat, pickles, tobacco, wood, food and industrial processes.

> FUNCTION

- Control of **cooling, heating and neutral zone** temperature and humidity conditions, to humidify or dehumidify by means of cooling and heat support.
- Defrost and heat supply by means of **cycle inversion**.
- Cycle programming.
- **Alarm management.**
